**NEW-YORK.**

---

*The Terms will be made known at the Sale*

---

**NEW-YORK:**

**H. SPEAR, PRINTER, 119, FLY-MARKET-STREET**

**1825.**

## NOTICE.

These Plants may be purchased with the most confident reliance on their being, in every instance, of the kinds specified in the Catalogue ; and not only so, but that they will prove thrifty beyond the most sanguine expectations. This confidence is founded on thorough experiments. Importations of similar lots from the same establishment in Paris, and by the same hands, have been made into Boston during the last three years. Nine tenths of them are now in the most flourishing state, and a great proportion have borne fruits, which have invariably been of the kinds named in the Catalogues, and larger and of much finer flavour than from those raised in this country. The most respectable references can be given if required, to verify the above statement.

It is universally acknowledged to be extremely desirable, that the great variety of delicious fruits, for which France is so celebrated, should be introduced more generally into this country ; while it is equally true that none of our cities are so destitute of them, as this. Influential Horticulturists have therefore encouraged the importation of this lot, and recommended a public sale in this city, and a strong confidence is indulged that patriotic individuals will come forward and purchase liberally. Grafts and Buds for distribution, can be taken from them this spring, and next fall, with the greatest success.

Great care has been taken to preserve all the small roots and fibres by enveloping them in an extra quantity of moss and straw.

N. B. Leaden numbers will be found attached to each plant, corresponding with those on the Catalogue.
